DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13-20, are drawn to an image sensor system classified in class 257 subclass 89.
- II. Claims 1-12, are drawn to a method of fabricating an image sensor, classified in class 438, subclass 15+.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the exposed portions of the bottom antireflection coating could be removed by wet or dry etching.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
